¹ Tail unit included.
² Rear Light Included.
³ OEM indicator light brackets included.
⁵ The Rizoma License Plate Support PT317B contains only the USA plate holder.
⁶ Compatible with side bags.
⁷ Cable Kit EE109-01 for marker lights FR155 included.
⁸ For conformity to EURO 4 legislation, lateral reflector kit EE400H is required.
⁹ To fit the OEM indicators the adapter FR425B is required.
¹⁰ To fit the OEM indicators the adapter FR426B is required. The chain tensioners are included.
¹¹ Attention, to mount the PT665 it's required to remove the rear OEM fender.

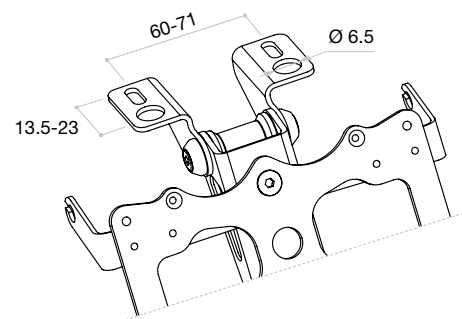

USA VERSION
Each kit includes a USA size plate holder.

Universal license plate support

PATENT® EEC ABE

Type	■
Universal	PT061B

The universal license plate holder offers the outstanding performance of all RIZOMA products. With its adjustable mounting plates, it is easy to mount to a wide range of makes and models. With a range of angle and extension adjustment, it is equipped with a reflector and the latest SMD LED lights, for full compliance with European legal requirements. Our license plate support kit includes: License plate support light, Reflector, 157x157 mm support, 146x69.5 mm support, Indicator light supports. The License plate light can be replaced with Rizoma Rear Light (code EE130B), which can be purchased separately, and integrates license plate light and rear light. The Universal License Plate Support complies with cases where a specific item dedicated to your motorcycle model has not been developed. We suggest to always check the dimensions and the technical drawing before purchasing. Provided with ABE certification.

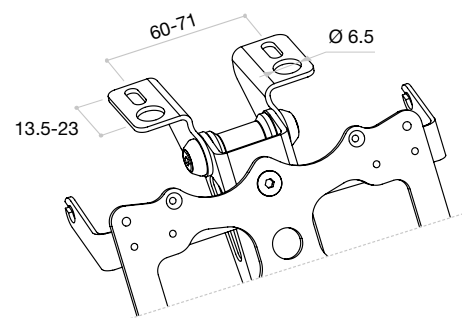

Universal license plate support "BASIC"

PATENT® EEC

Type	■
Universal "BASIC"	PT062B

This cutdown version is not equipped with a reflector or light, for situations in which they are not legally required or the bike is already fitted with them. Our license plate support kit includes: 146x69.5 mm support, Indicator light supports.

DYNAMIC BRAKE LIGHT SENSOR

The Rizoma Dynamic Brake Light Sensor DBL001H, is an accelerometer, which aims to inform the rider that follows, through a intermittent signal, the bike that precedes it is under sudden deceleration.

The DBL001H is connected to the rear light of the bike or to our three functions indicators (position, indicator, stop): FR155, FR165, FR125, FR115.

The functionality of the Dynamic Brake Light Sensor is activated by a sudden braking: the stop light illuminates intermittently with a frequency of 4 Hz (4 flashes per second). The flashing continues during the braking phase for 4.5 seconds before to come back to normal rear light.
